**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) Responsive to communication(s) filed on 05 July 2005.
- 2a) This action is **FINAL**.                                    2b) This action is non-final.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

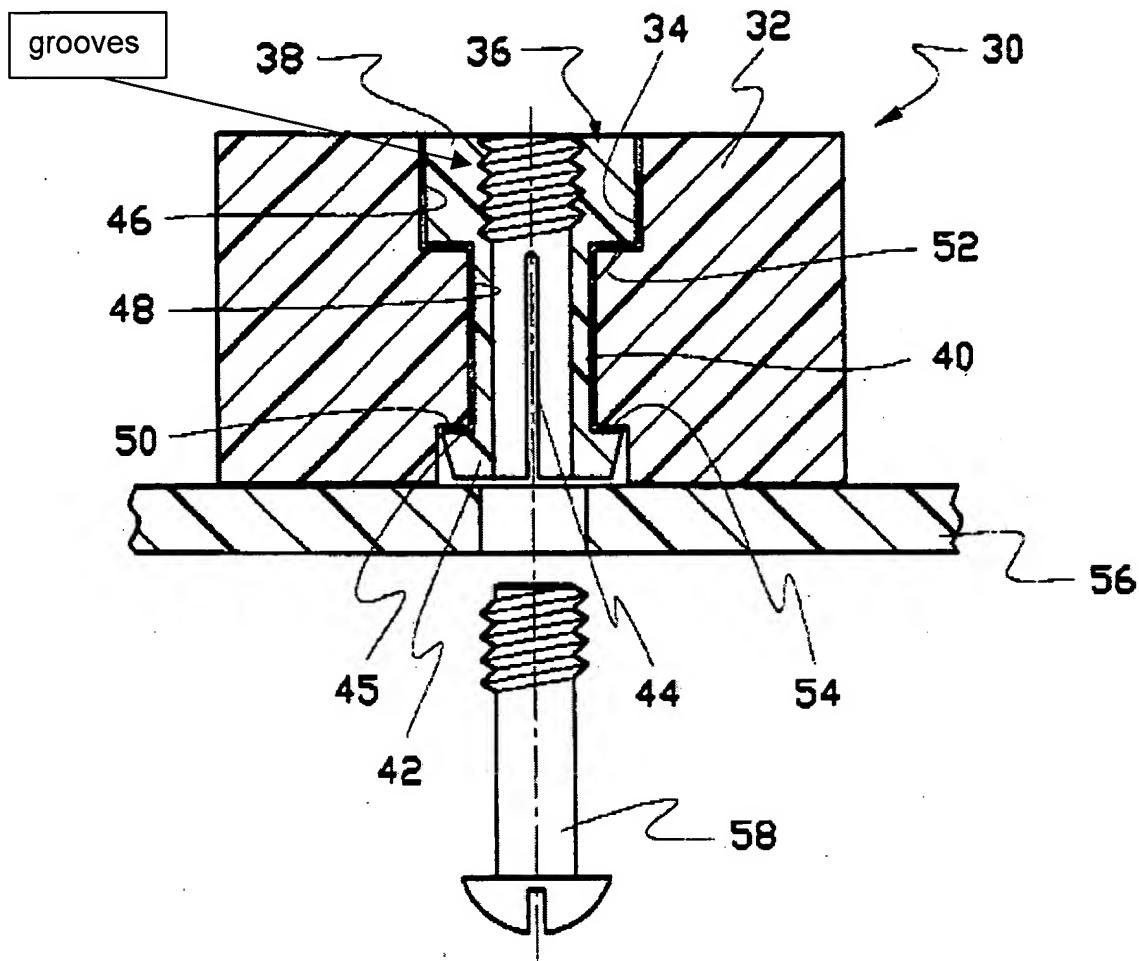

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 18, 20, 21, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by pan et al. (5,616,052).

In regard to claim 18, Pan et al. discloses a receiving element 32 for a plug connection device, comprising: openings 36 with a substantially uniform inner surface formed for contacting a contact pin 58, the inner surface having receiving element grooves (see attached drawing) extending in a radial direction, wherein a distance between adjacent receiving element grooves is smaller than a distance between adjacent openings 34, 36, the receiving element grooves extend further in a radial direction than in a longitudinal direction, and the receiving element 32 is made from a non-conductive material.

In regard to claim 20, Pan et al. discloses the receiving element grooves extend transversely to a mating direction of a contact pin 58.

In regard to claim 21, Pan et al. discloses machining marks are removed in an area of the receiving element grooves.

In regard to claim 23, Pan et al. discloses that the receiving element grooves are inclined with respect to a longitudinal direction of the opening 36.

In regard to claim 24, Pan et al. discloses that the receiving element grooves are inclined by about 45 degrees.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pan et al..

In regard to claim 25, Pan et al. discloses a receiving element 32 for a plug connection device, comprising: openings 36 with a substantially uniform inner surface formed for contacting a contact pin 58, the inner surface having receiving element grooves (see attached drawing) extending in a radial direction, wherein a distance between adjacent receiving element grooves is smaller than a distance between adjacent openings 34, 36, and the receiving element 32 is made from a non-conductive material.

However, Pan et al. does not disclose that the receiving element grooves have a teardrop shape.

It would have been obvious to modify Pan et al. by having the receiving grooves with different type of configurations since applicants have presented no explanation that these particular configurations of the receiving grooves are significant or are anything

more than one of numerous configurations a person of ordinary skill in the art would find obvious for the purpose of providing mating surfaces between two members. A change in shape is generally recognizing as being within the level of ordinary skill in the art. *In re Dailey*, 149 USPQ 47 (CCPA 1976).

***Allowable Subject Matter***

5. The indicated allowability of the original claims 22 and 25.
6. Claims 1-12 and 14-17 are allowed.

***Response to Arguments***

7. The finality of the rejection of the last Office action is withdrawn.
8. Applicant's arguments with respect to claims 18, 20, 21 and 23-25 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
